

AMENDMENTS TO THE SPECIFICATION:

Please substitute the attached copy of the originally filed specification for the specification currently of record with the U.S. Patent and Trademark Office (USPTO). The attached is a copy of the original specification of the 10/657,119 Application, filed on September 9, 2003, and thus contains no new matter. A substitute specification was requested by the Examiner to correct certain revisions apparently introduced into the text after it was received in the USPTO. Accordingly, markings showing changes relative to the immediate prior version are not required.

Attachments: Copy of the as-filed specification (pages 1-15).
